Process for Deep Desulfurization

## Technology Summary

A novel process for deep desulfurization of liquid hydrocarbons, which combines a selective adsorption process of the sulfur compounds and a hydrodesulfurization process of the concentrated sulfur fraction. The sulfur compounds in fuels are first adsorbed on the adsorbent in an adsorber, then recovered by solvent elution. The spent adsorbent is regenerated via solvent elution followed by removal of the solvent. The eluate is sent to an evaporator to recycle the solvent and to obtain a concentrated sulfur fraction, which accounts for less than 1 wt percent of the whole fuel. The concentrated sulfur fraction is hydrodesulfurized in a small HDS reactor. Then, the HDS product is blended with the hydrocarbon fraction from the adsorber.

## Application & Market Utility

This process has significant advantages over other methods such as IRVAD, S Zorb, and TreND. This process works at ambient temperature and ambient pressure. There is a low hydrogen consumption in this process. There is easy regeneration of the spent adsorbent, low investment and operating cost, and little to no octane penalty.

## Next Steps

Regular patent (8,158,843) issued on 3/28/2012. Further modification and optimization in progress, as well as scale-up testing.

Invent Penn State is a Commonwealth-wide initiative to spur economic development, job creation, and student career success. Invent Penn State blends entrepreneurship-focused academic programs, business startup training and incubation, funding for commercialization, and university-community collaborations to facilitate the challenging process of turning research discoveries into valuable products and services that can benefit Pennsylvanians and humankind. Learn more at invent.psu.edu.

Penn State is an equal opportunity, affirmative action employer, and is committed to providing employment opportunities to all qualified applicants without regard to race, color, religion, age, sex, sexual orientation, gender identity, national origin, disability or protected veteran status.
