

# Seamless Architecture: Innovative Material Interfaces

ID# 2015-4394

Interface Between Glass-foam and Glass

## Technology Summary

When there are two building materials placed next to one another, there must be a joint that addresses air-tightness, water-tightness, load bearing, and/or multiple other requirements. Conventionally, joints are created by introducing a third element that either mechanically fastens the two components or uses an adhesive to create a bond between them. As a result, the coordination is complicated and difficult, many aspects can fail, and the seal is never guaranteed. There is a need for elimination of as many mechanical joints as possible without undermining functionality. The technology is a seamless/transitioning interface(s) between various materials and/or building components that can introduce a progressive transition (a gradience) between these materials.

## Application & Market Utility

The development of sustainable materials, processes, and practices. Providing solutions for building in harsh conditions where impermeability between surface materials is required. Furthering development of additive manufacturing technologies in the building industry. Producing seamless architecture for use in both the arts and industrial design

## Next Steps

Seeking research collaboration and licensing opportunities.

TECHNOLOGY READINESS LEVEL

4-7

### Seeking

Investment | Licensing | Research

### Keywords

- Impermeable Joints
- Seamless Architecture
- Additive Manufacturing

Invent Penn State is a Commonwealth-wide initiative to spur economic development, job creation, and student career success. Invent Penn State blends entrepreneurship-focused academic programs, business startup training and incubation, funding for commercialization, and university-community collaborations to facilitate the challenging process of turning research discoveries into valuable products and services that can benefit Pennsylvanians and humankind. Learn more at [invent.psu.edu](http://invent.psu.edu).

Penn State is an equal opportunity, affirmative action employer, and is committed to providing employment opportunities to all qualified applicants without regard to race, color, religion, age, sex, sexual orientation, gender identity, national origin, disability or protected veteran status.
